OUR PROFESSIONAL DRYER VENT SOLUTIONS

DRYER VENT SERVICES

- Dryer Vent Cleaning
- Remove Clogs and Debris
- Booster Fan Cleaning
- Lint Screen and Trap Cleaning
- Multi-Unit Dryer Vent Cleaning
- Commercial Dryer Vent Cleaning

DRYER VENT UPGRADES & REPAIR

- Wall Vent Installation
- Dryer Flex Installation
- Bird and Pest Prevention
- Dryer Vent Re-Routing
- Dryer Box Installation
- Roof Vent Installation

DUCTBUSTERS IS HERE TO HELP

DUCTBUSTERS Service Technicians are trained and certified to ensure that your entire dryer vent system is cleaned and maintained to fit the needs of your home or commercial property. Our goal is to improve the efficiency and safety of your home, building, and occupants.

Properly maintaining and cleaning dryer vents reduces drying time and keeps dryers functioning at peak performance for longer. This reduces costs on utility bills and minimizes damage to clothing and the dryer itself. It also helps prevent dryer fires, which are one of the most common types of building fires.

THE IMPORTANCE OF DRYER VENT CLEANING

WARNING SIGNS YOUR DRYER VENTS SHOULD BE CLEANED IMMEDIATELY:

- It has been a year or more since the dryer vents have been cleaned
- The dryer gets hot to the touch on the outside of the unit
- Clothes coming out of the dryer are unusually hot
- The outside vent flaps or louvers do not open when the dryer is on
- The dryer turns off before the cycle is complete, indicating unsafe temperatures
- It often takes multiple cycles or longer than usual to dry the contents in the dryer

HOW OFTEN DO DRYER VENTS NEED TO BE CLEANED?

Most dryer manufacturers require a professional cleaning in order to maintain the dryer warranty, and the recommended frequency varies based on usage.

Residential Dryers: Should be professionally cleaned once per year.

Commercial Dryers: Should be professionally cleaned on a regular basis, ranging from once a month to every 6 months.

Specific cleaning recommendations are included in your dryer's installation and care manuals. (See example below.)

DRYER VENT CLEANING RECOMMENDATION: Excerpt from Maytag & Whirlpool Commercial Dryer Installation Guide

SECTION VI: ROUTINE MAINTENANCE

A. CLEANING: A Program and/or schedule should be established for periodic inspection, cleaning and removal of lint from various areas of the dryer, as well as throughout the ductwork system. The frequency of cleaning can be best determined from experience at each location. Maximum operating efficiency is dependent upon proper air circulation. The accumulation of lint can restrict this air flow. If the guidelines in this section are met, a MAYTAG dryer will provide many years of efficiency, trouble free, and most importantly, safe operation.

IMPORTANT: Dryer produces combustible lint and must be exhausted to the outdoors. Every 6 months, inspect the exhaust ducting and remove any lint build up.

THE DUCTBUSTERS PROMISE

- DUCTBUSTERS never offers “too-good-to-be-true” coupons or Groupons
 - DUCTBUSTERS crews are trained and certified to adhere to all industry standards
 - DUCTBUSTERS provides a before-and-after photo report for every job
